DESCRIPTION (TO INCLUDE JUSTIFICATION)

DCAT 22's current video server is over 11 years old; our video switcher has been around since the station equipment was installed. Our VOD server/digital video recorder is no longer being produced by Leightronix. We estimate that they will no longer be supporting these units after the next five or so years. All of our equipment is SD (Standard Definition), which includes the Council Chamber cameras. SD is fast becoming a thing of the past (if not already) and one reason these components will no longer be available or updated. Being an SD stations means our SD components will need to be swapped out for HD equipment. It's important to note that even though we broadcast in SD, new equipment will allow us to stream in HD and also our VOD (video on demand) will be viewable in HD. It's our understanding that Comcast is open to the possibility of opening up an HD signal for cable access stations at some point in the future. DCAT has a fiber line from the control room to the Comcast Head End in Dover.

This request is for the buildout of new HD components/systems, including Castus VOD server; this server is pretty much a "studio in a box" system. It controls video on demand, live streaming, instant recording and uploading of programming plus many more features too numerous to list. New Robotic cameras would need to be instalted in the Council Chambers, along with the necessary mounts, controller, monitors, wiring and labor. Total estimated cost for buildout is \$55,598.00

With the renovation of the Police Department, DCAT/IT thought this a perfect opportunity to add one POE (powered over ethernet) camera & the necessary audio equipment to either record or broadcast live from the PD Community Room. No studio will be necessary as the camera can be controlled from our new switcher located in the DCAT Control Room in the Town Hall. Total estimated cost: \$7,773.00
