## MEMO

**To:** Todd Selig, Town Administrator  
**From:** Dave Emanuel, Fire Chief  
**Re:** FY 2019 Fire Department Operating Budget  
**Date:** September 21, 2018

---

The FY2019 fire department operating budget process has provided the department with an opportunity to evaluate the current needs of the organization as well as positioning it and the Town for success in coming years.

The attached budget is consistent with 2018 fire suppression and inspection staffing and service levels regarding wages and overtime. There were two funding requests included in the first round of budget proposals which impact the department's overall staffing levels and operating costs. They include the restoration of a training and safety officer position and the transition from a part-time to full time office assistant to mainly support the Fire Prevention Bureau.

The proposed training and safety officer is to reinstate a position which was last staffed by a Captain from 1999 to 2005. The training requirements and needs of the fire department organization demonstrate that a full-time equivalent position would plan, prepare, and execute standardized training across the four fire department work groups as well as assist with collaboration between Durham's first-due mutual aid communities that support the Town and University when the fire department is pushed beyond the on-duty staff capabilities. This proposed position is intended to work with the current fire department Captains to provide some shift coverage relief of their overtime responsibilities during their times of need at an overtime cost savings to the Town and would also be the key player responsible for training and documentation to better meet state, and national and professional standards. (Please note that the operating budget does not reflect any overtime savings in the suppression wage line as has not been included in the operating budget as the proposed position description and working parameters have not been defined)

The current Fire Prevention Bureau office assistant position has been staffed at 28-hour per week as a part-time position. This position performs a variety of diverse and routine administrative duties to support the department. Although staffing this position as a full-time equivalent is desirable, the fire department has experienced turnover in both administrative assistant positions and is willing to evaluate this funding request further once the reorganization of the administrative support staff is complete.

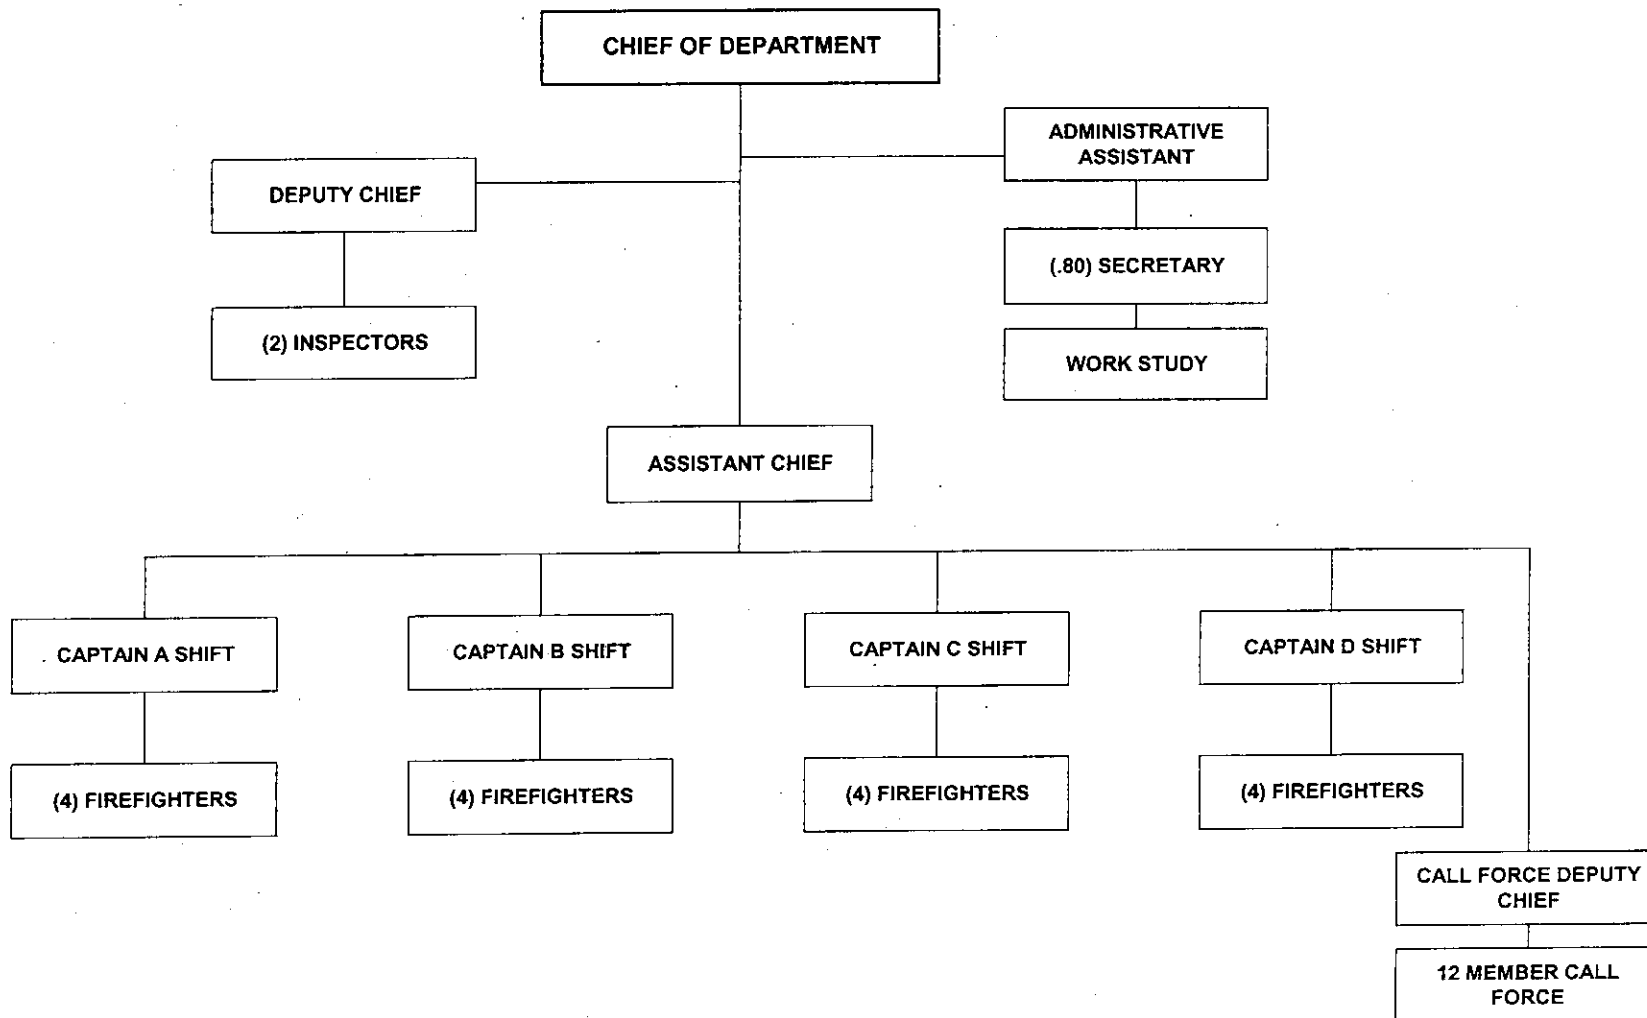

To address immediate space needs of the fire department, as the existing fire station facility is inadequate for a modern emergency services operation, the department is working with UNH to acquire approximately 1,000 square feet of additional space in the UNH Service Building which is contiguous to the existing Durham fire station. The space currently consists of two garage bays with overhead doors which face the north visitor parking area. This space is occupied by subsidiaries of UNH Maintenance and UNH Housekeeping entities. The department has worked with UNH Facilities to review the current office configuration of the Fire Prevention Bureau to identify the need for additional space to meet current space-to-people ratios and to verify that the office is over crowded with the staff of three full-time employees who are assigned to the space (which was formerly the fire chief's office). UNH Facilities has worked with the fire department to provide conceptual layouts to reorganize the Prevention Bureau in the existing fire department training/workout room and relocate the training/workout room to this proposed ground floor space. The fire department is recommending the acquisition of this additional 1,000 square foot space because it has been targeted for acquisition for years and this is the first time that it has potentially been available to repurpose by UNH. This proposal has been reflected by a rent increase in the proposed 2019 building rent.

This proposed building rent increase only covers the building rent for the targeted space. It does not address the fit-up of the space or improvements to modify the building (those projected costs have been included in the 2019 Capital Improvements Program). This acquisition of additional space does not solve all the space needs of the fire department, it is only a small temporary step to help accommodate the needs of the professional staff to better serve the community.

There are several budget line requests related to equipment and communications which are still being refined as we complete the acquisition of the replacement engine (Engine 2) and close out the capital improvement program purchase.

Thank you for your consideration of our FY2019 budget requests. We look forward to working with you, the University of New Hampshire, and the Council as the process proceeds.

<i>Narrative for Column # 6</i>								
Medical testing and exams are performed annually by the Center for Occupational and Employee Health (COEH) located in Exeter. We have priced similar facilities in the region and found comparable pricing. COEH is associated with the Exeter Hospital and allows testing to be performed immediately without future appointments. Other facilities require patient establishment with Exeter in order to proceed with testing, which becomes more costly for overtime. This facility is also familiar with the requirements of NFPA 1582.								
<b>01-4220-702-06-000</b>	Uniforms & Cleaning - Suppression	19,086.39	16,030.57	13,665.94	15,000.00	6,737.09	15,000.00	15,000.00

	<i>Narrative for Column # 6</i>							
	The proposed wage increase is to reinstate the Fire Department Training Officer position which was last staffed by a Captain from 1999 to 2005. The training requirements and needs of the fire department organization demonstrate that a full-time equivalent position would plan, prepare, and execute standardized training across the four fire department work groups as well as assist with collaboration between Durham's first-due mutual aid communities that support the Town and University when the fire department is pushed beyond the on-duty staff capabilities. This position is intended to work with the current fire department Captains to provide some shift coverage relief of their overtime responsibilities during their times of need at an overtime cost savings to the Town. This position would also be the key player responsible for training and documentation to better meet state, and national and professional standards.
