Proposed changes (check all that apply)

Describe proposed changes – Modifications to previously approved HDC application dated 04/03/14 and modified on 08/6/15 and 9/3/15. The following is an itemized list of corrections and adjustments as provided to the applicant by the Town Planner, Michael Behrendt.

25 Main Street.

- Shutters. Shutters will be added to the nine windows on the front façade. They will be wood and hung with stamped steel hardware to give the appearance of operability as approved on August 6, 2015. The color for the shutters will be "eggplant" as approved on September 3, 2015.

- Dormers. The windows in the two dormers will be replaced with 6/6 windows as originally approved.

35 Main Street.

- Front steps, Stone Wall and Building Foundation. Sketches have been provided to illustrate and detail the front steps. The stoop and stair treads and risers will be clad in granite per the previously approved plans. The previously approved stone retaining wall has been extended around the Grange side of the property to cover a portion of the exposed building foundation. It will be a mortared stone wall similar to what was previously there. A handrail has been added because it is required by building code and shall be made of black steel that gives a similar appearance to wrought iron.

Building A.

- Shutters and Signage. Two shutters will be added to the front elevation as previously approved by the HDC. The wall sconce light fixtures will be removed and the egress lighting, which is required by code, shall be from a concealed fixture located in the canopy. The sign shall be removed from this location and a signage package will be submitted by owner at a later date.

- Retaining Wall. Details of the proposed retaining wall have been submitted with this application. A granite block retaining will, constructed of salvaged granite that was saved during demolition, is proposed to run parallel to Main Street. A planting bed will separate this area from the sidewalk**.** A small area of pre-engineered retaining wall will be added adjacent to the rubble foundation of 21 Main Street for erosion control and stabilization.

- Lights. A lighting fixture specification has been attached to this application. The fixture matches the appearance of the fixture previously approved by the HDC,

which was subsequently discontinued by the manufacturer. The proposed fixture also provides the option for shielding as requested by the abutter. Fixtures along the property line between Building A and 21 Main Street will be replaced with this fixture.

Building B.

- Dormers. Per the approval of the HDC on September 3, 2015, the triangular sections just beyond the dormer windows will be replaced with clapboard siding and be painted yellow to match the main siding of the building.

Building C.

- Color. Building C will be repainted to Chestnut Brown siding with Khaki Brown trim per the HDC approval.

Building D.

- Color. Building D will be repainted to Boothbay Blue siding with Khaki Brown trim per the HDC approval.

Site and General Issues

- Wall, dumpster, transformer and Generator. The utility company required that a second transformer be added to the site after construction had commenced. Due to minimum clearance requirements this required that the generator be relocated to behind Building B, the dumpster enclosure to be moved closer to 35 Main Street and the new transformer be located between the dumpster enclosure and Building B. These revisions, along with a widening of the concrete section for the trash truck maneuvering were submitted to the Durham Planning Department on August 29, 2014 for administrative approval (see attached letter). The Durham Fire Department has since requested that the dumpster enclosure be made of non-combustible materials. The proposed solution is attached herewith which includes added vegetation to screen the transformer and cladding the CMU dumpster enclosure with the same brick that is used elsewhere on site. The attached site plan also shows the new generator pad location behind Building B which is out of sight from all public ways. Cut sheets of the generator have been included for reference.

- Signage. All non-approved signage shall be removed from the site and a signage package will be submitted by owner at a later date.

- Vents. Vents poking through the roof that are visible from the public way will be painted black.

Proposed starting date: **Currently under construction**

Submission of application

This application must be signed by the property owner, the applicant/developer (if different from property owner), *and/or* the agent.

RE: A&M Project #1925-01
Orion Student Housing
25-35 Main Street
Durham, NH 03824

Dear Mr. Behrendt:

On behalf of Orion UNH LLC, Allen & Major Associates requests the administrative approval of a site plan amendment to the Orion Student Housing project located at 25-35 Main Street. The revisions to the site plans include the following:

- Relocation of the backup generator and associated concrete pad to the rear of Building B.
- The pervious paver section in front of the dumpster enclosure has been widened by 2 feet.
- The dumpster enclosure and associated concrete pad has been shifted 8.5 feet to the northeast. The portion of the dumpster enclosure wall facing Building B will be constructed of noncombustible materials.
- A transformer and associated concrete pad will be located between the dumpster enclosure and Building B.
- The retaining wall proposed to run parallel to the 21 Main Street property line has been extended by 45 feet to the northeast.

Please find attached revised C-1, C-2 and a new D-7 sheet, which display the changes outlined above. Note that dimensions have been given to ensure that proper safety clearances from the transformer as well as access to the side and rear of Building B will be maintained.

Please feel free to contact our office with any questions or concerns.

Very truly yours,

Robert P. Clarke

Introduction

The D-Series Wall luminaire is a stylish, fully integrated LED solution for building-mount applications. It features a sleek, modern design and is carefully engineered to provide long-lasting, energy-efficient lighting with a variety of optical and control options for customized performance.

With an expected service life of over 20 years of nighttime use and up to 74% in energy savings over comparable 250W metal halide luminaires, the D-Series Wall is a reliable, low-maintenance lighting solution that produces sites that are exceptionally illuminated.

NOTES

1 MVOLT driver operates on any line voltage from 120-277V (50/60 Hz). Specify 120, 208, 240 or 277 options only when ordering with fusing (SF, DF options), or photocontrol (PE option).
2 Only available with 20C, 700mA or 1000mA. Not available with PIR or PIRH.
3 Back box ships installed on fixture. Cannot be field installed. Cannot be ordered as an accessory.
4 Photocontrol (PE) requires 120, 208, 240, 277 or 347 voltage option. Not available with motion/ambient light sensors (PIR or PIRH).
5 PIR specifies the Sensor Switch SBGR-10-ODP control; PIRH specifies the Sensor Switch SBGR-6-ODP control; see Motion Sensor Guide for details. Includes ambient light sensor. Not available with "PE" option (button type photocell). Dimming driver standard. Not available with 20 LED/1000 mA configuration (DSXW1 LED 20C 1000).
6 Cold weather (-20C) rated. Not compatible with conduit entry applications. Not available with BBW mounting option. Not available with fusing. Not available with 347 or 480 voltage options. Emergency components located in back box housing. Emergency mode IES files located on product page at www.lithonia.com
7 Single fuse (SF) requires 120, 277 or 347 voltage option. Double fuse (DF) requires 208, 240 or 480 voltage option. Not available with ELCW.
8 Also available as a separate accessory; see Accessories information.
9 See the electrical section on page 3 for more details.

Performance Data

Lumen Ambient Temperature (LAT) Multipliers

Use these factors to determine relative lumen output for average ambient temperatures from 0-40°C (32-104°F).

Ambient		Lumen Multiplier
0°C	32°F	1.02
10°C	50°F	1.01
20°C	68°F	1.00
25°C	**77°F**	**1.00**
30°C	86°F	1.00
40°C	104°F	0.98

Projected LED Lumen Maintenance

Data references the extrapolated performance projections for the **DSXW1 LED 20C 1000** platform in a **25°C ambient**, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate LLF, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other lumen maintenance values, contact factory.

Operating Hours	0	25,000	50,000	100,000
Lumen Maintenance Factor	1.0	0.95	0.93	0.88

FEATURES & SPECIFICATIONS

INTENDED USE
The energy savings, long life and easy-to-install design of the D-Series Wall Size 1 make it the smart choice for building-mounted doorway and pathway illumination for nearly any facility.

CONSTRUCTION
Two-piece die-cast aluminum housing has integral heat sink fins to optimize thermal management through conductive and convective cooling. Modular design allows for ease of maintenance. The LED driver is mounted to the door to thermally isolate it from the light engines for low operating temperature and long life. Housing is completely sealed against moisture and environmental contaminants (IP65).

FINISH
Exterior parts are protected by a zinc-infused Super Durable TGIC thermoset powder coat finish that provides superior resistance to corrosion and weathering. A tightly controlled multi-stage process ensures a minimum 3 mils thickness for a finish that can withstand extreme climate changes without cracking or peeling. Available in textured and non-textured finishes.

OPTICS
Precision-molded proprietary acrylic lenses provide multiple photometric distributions tailored specifically to building mounted applications. Light engines are available in 3000 K (80 min. CRI), 4000 K (70 min. CRI) or 5000 K (70 CRI) configurations.

ELECTRICAL
Light engine(s) consist of 10 high-efficacy LEDs mounted to a metal-core circuit board to maximize heat dissipation and promote long life (L88/100,000 hrs at 25°C). Class 1 electronic drivers have a power factor >90%, THD <20%, and a minimum 2.5KV surge rating. When ordering the SPD option, a separate surge protection device is installed within the luminaire which meets a minimum Category C Low (per ANSI/IEEE C62.41.2).

INSTALLATION
Included universal mounting bracket attaches securely to any 4" round or square outlet box for quick and easy installation. Luminaire has a slotted gasket wireway and attaches to the mounting bracket via corrosion-resistant screws.

LISTINGS
CSA certified to U.S. and Canadian standards. Rated for -40°C minimum ambient.

DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at www.designlights.org to confirm which versions are qualified.

WARRANTY
Five year limited warranty. Full warranty terms located at www.acuitybrands.com/CustomerResources/Terms_and_conditions.aspx.

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25°C. Specifications subject to change without notice.

Powering Ahead

For over 50 years, Generac has led the industry with innovative design and superior manufacturing.

Generac ensures superior quality by designing and manufacturing most of its generator components, including alternators, enclosures and base tanks, control systems and communications software.

Generac's gensets utilize a wide variety of options, configurations and arrangements, allowing us to meet the standby power needs of practically every application.

Generac searched globally to ensure the most reliable engines power our generators. We choose only engines that have already been proven in heavy-duty industrial application under adverse conditions.

Generac is committed to ensuring our customers' service support continues after their generator purchase.

Standard Features

ENGINE SYSTEM

General

- Oil Drain Extension
- Air Cleaner
- Fan Guard
- Stainless Steel flexible exhaust connection
- Critical Exhaust Silencer (enclosed only)
- Factory Filled Oil
- Radiator Duct Adapter (open set only)

Fuel System

- Fuel lockoff solenoid
- Primary fuel filter

Cooling System

- Closed Coolant Recovery System
- UV/Ozone resistant hoses
- Factory-Installed Radiator
- Radiator Drain Extension
- 50/50 Ethylene glycol antifreeze
- 120 VAC Coolant Heater

Engine Electrical System

- Battery charging alternator
- Battery cables
- Battery tray
- Solenoid activated starter motor
- Rubber-booted engine electrical connections

ALTERNATOR SYSTEM

- UL2200 GENprotect™
- 12 leads (3-phase, non 600 V)
- Class H insulation material
- Vented rotor
- 2/3 pitch
- Skewed stator
- Auxiliary voltage regulator power winding
- Amortisseur winding
- Brushless Excitation
- Sealed Bearings
- Automated manufacturing (winding, insertion, lacing, varnishing)
- Rotor dynamically spin balanced (get tolerance)
- Full load capacity alternator
- Protective thermal switch

GENERATOR SET

- Internal Genset Vibration Isolation
- Separation of circuits - high/low voltage
- Separation of circuits - multiple breakers
- Silencer Heat Shield
- Wrapped Exhaust Piping
- Silencer housed in discharge hood (enclosed only)
- Standard Factory Testing
- 2 Year Limited Warranty (Standby rated Units)
- 1 Year Limited Warranty (Prime rated units)
- Silencer mounted in the discharge hood (enclosed only)

ENCLOSURE (if selected)

- Rust-proof fasteners with nylon washers to protect finish
- High performance sound-absorbing material
- Gasketed doors
- Stamped air-intake louvers
- Air discharge hoods for radiator-upward pointing
- Stainless steel lift off door hinges
- Stainless steel lockable handles
- Rhino Coat™ - Textured polyester powder coat

TANKS (if selected)

- UL 142
- Double wall
- Vents
- Sloped top
- Sloped bottom
- Factory pressure tested (2 psi)
- Rupture basin alarm
- Fuel level
- Check valve in supply and return lines
- Rhino Coat™ - Textured polyester powder coat
- Stainless hardware

CONTROL SYSTEM

Control Panel

- Digital H Control Panel - Dual 4x20 Display
- Programmable Crank Limiter
- 7-Day Programmable Exerciser
- Special Applications Programmable PLC
- RS-232/485
- All-Phase Sensing DVR
- Full System Status
- Utility Monitoring
- Low Fuel Pressure Indication
- 2-Wire Start Compatible
- Power Output (kW)
- Power Factor
- kW Hours, Total & Last Run
- Real/Reactive/Apparent Power
- All Phase AC Voltage
- All Phase Currents
- Oil Pressure
- Coolant Temperature
- Coolant Level
- Engine Speed
- Battery Voltage
- Frequency
- Date/Time Fault History (Event Log)
- Isochronous Governor Control
- Waterproof/sealed Connectors
- Audible Alarms and Shutdowns
- Not in Auto (Flashing Light)
- Auto/Off/Manual Switch
- E-Stop (Red Mushroom-Type)
- NFPA110 Level I and II (Programmable)
- Customizable Alarms, Warnings, and Events
- Modbus protocol
- Predictive Maintenance algorithm
- Sealed Boards
- Password parameter adjustment protection
- Single point ground
- 15 channel data logging
- 0.2 msec high speed data logging
- Alarm information automatically comes up on the display

Alarms

- Oil Pressure (Pre-programmable Low Pressure Shutdown)
- Coolant Temperature (Pre-programmed High Temp Shutdown)
- Coolant Level (Pre-programmed Low Level Shutdown)
- Low Fuel Pressure Alarm
- Engine Speed (Pre-programmed Over speed Shutdown)
- Battery Voltage Warning
- Alarms & warnings time and date stamped
- Alarms & warnings for transient and steady state conditions
- Snap shots of key operation parameters during alarms & warnings
- Alarms and warnings spelled out (no alarm codes)

Configurable Options

ENGINE SYSTEM

General
- ○ Oil Make-Up System
- ○ Oil Heater
- ○ Industrial Exhaust Silencer

Fuel System
- ○ Flexible fuel lines
- ○ Primary fuel filter

Engine Electrical System
- ○ 10A UL battery charger
- ○ 2.5A UL battery charger
- ○ Battery Warmer

ALTERNATOR SYSTEM

- ○ Alternator Upsizing
- ○ Anti-Condensation Heater
- ○ Tropical coating
- ○ Permanent Magnet Excitation

CIRCUIT BREAKER OPTIONS

- ○ Main Line Circuit Breaker
- ○ 2nd Main Line Circuit Breaker
- ○ Shunt Trip and Auxiliary Contact
- ○ Electronic Trip Breakers

GENERATOR SET

- ○ Gen-Link Communications Software (English Only)
- ○ 8 Load Position Load Center
- ○ 2 Year Extended Warranty
- ○ 5 Year Warranty
- ○ 5 Year Extended Warranty

ENCLOSURE

- ○ Weather Protected
- ○ Level 1 Sound Attenuation
- ○ Level 2 Sound Attenuation
- ○ Steel Enclosure
- ○ Aluminum Enclosure
- ○ 150 MPH Wind Kit
- ○ 12 VDC Enclosure Lighting Kit
- ○ 120 VAC Enclosure Lighting Kit
- ○ AC/DC Enclosure Lighting Kit
- ○ Door Alarm Switch

- ○ 13" Vent Extension
- ○ 19" Vent Extension

CONTROL SYSTEM

- ○ 21-Light Remote Annunciator
- ○ Remote Relay Panel (8 or 16)
- ○ Oil Temperature Sender with Indication Alarm
- ○ Remote E-Stop (Break Glass-Type, Surface Mount)
- ○ Remote E-Stop (Red Mushroom-Type, Surface Mount)
- ○ Remote E-Stop (Red Mushroom-Type, Flush Mount)
- ○ Remote Communication - Modem
- ○ Remote Communication - Ethernet
- ○ 10A Run Relay
- ○ Ground fault indication and protection functions

Engineered Options

ENGINE SYSTEM

- ○ Coolant heater ball valves
- ○ Block Heaters
- ○ Fluid containment pans

CONTROL SYSTEM

- ○ Spare inputs (x4) / outputs (x4) - H Panel Only
- ○ Battery Disconnect Switch

ALTERNATOR SYSTEM

- ○ 3rd Breaker System

GENERATOR SET

- ○ Special Testing
- ○ IBC Seismic Certification

ENCLOSURE

- ○ Motorized Dampers
- ○ Door switched for intrusion alert
- ○ Enclosure ambient heaters

TANKS

- ○ Overfill protection valve
- ○ UL2085 Tank
- ○ ULC S-601 Tank
- ○ Stainless Steel Tank
- ○ Special Fuel Tanks (MIDEQ and FL DEP/DERM, etc.)
- ○ Vent Extensions

Rating Definitions

Standby – Applicable for a varying emergency load for the duration of a utility power outage with no overload capability.
Prime – Applicable for supplying power to a varying load in lieu of utility for an unlimited amount of running time. A 10% overload capacity is available for 1 out of every 12 hours. The Prime Power option is only available on International applications.

Power ratings in accordance with ISO 8528-1, Second Edition dated 2005-06-01, definitions for Prime Power (PRP) and Emergency Standby Power (ESP).
