**Re: NHDES Wetlands Permit by Notification (PBN)
Tax Map 12, Lot 24-2
28 Colony Cove Road
Durham, New Hampshire**

Dear Wetland Inspector:

This letter transmits a New Hampshire Department of Environmental Services (NHDES) Wetlands Permit by Notification requests to permit 143 sq. ft. of temporary impact for repair/replacement of an existing tidal docking structure.

The project proposes to repair/replace a section of the existing fixed pier, and replace the existing 3' x 20' wooden gangway with a 3' x 20' aluminum gangway.

The last 15 feet of the existing fixed pier will be replaced, along with 4 pilings, joists, and cross braces. A new 3' x 20' aluminum gangway with a non skid surface will replace the existing 3' x 20' wooden gangway.

This portion of the fixed pier to be repaired/replaced is in poor condition and needs to be replaced for safe use of the structure. The proposed tidal docking structure maintains the existing length of 154', providing one undersized slip on 53' of frontage along Little Bay.

Attached to this application you will find an "Existing Conditions Plan-C1" and a "NH DES Permit Plan-C2" which depict the existing lot, jurisdictional areas, abutting parcels, existing structures, proposed work, and permanent & temporary impact areas.

It is my belief that the proposed project meets Project Specific Criteria Project Number:5; Repair of an existing docking structure that meets all the criteria of Env-Wt 303.04 (v).

Please contact me if you have any questions or concerns regarding this application.

Respectfully submitted,

Project Description: The project proposes construction of a tidal docking structure on the subject lot.

The NH Natural Heritage database has been checked by staff of the NH Natural Heritage Bureau and/or the NH Nongame and Endangered Species Program for records of rare species and exemplary natural communities near the area mapped below. The species considered include those listed as Threatened or Endangered by either the state of New Hampshire or the federal government.

It was determined that, although there was a NHB record (e.g., rare wildlife, plant, and/or natural community) present in the vicinity, we do not expect that it will be impacted by the proposed project. This determination was made based on the project information submitted via the NHB Datacheck Tool on 11/17/2016, and cannot be used for any other project.
