Subject: electric vehicle charging | Mill Plaza | EV charging stations
Date: Thursday, January 27, 2022 9:01:27 AM

Greetings,

Please forward this email to the Planning Board as a prompt to discuss energy-related issues with Colonial Durham Associates, including but not limited to providing electric vehicle charging stations -- as I have suggested before.

That discussion should include a review of CDA's [Energy Considerations Checklist](#) dated January 2, 2020. According to the Checklist, **CDA does NOT intend to include:**

- Ability to charge electric vehicles
- Bicycle lane or path network within project area
- Energy usage monitoring system(s), e.g., smart meters or submeters
- Water usage monitoring system(s)
- Photovoltaic renewable electricity generation system (i.e., solar panels)
- Renewable hot water system (e.g., solar thermal)

The attached photograph was taken at Whole Foods Market in Portsmouth on January 14, 2022.

Regards,
