Greetings, Rick --

Please forward this email to the Planning Board. Thank you.

*

As of today, Colonial Durham Associates has not submitted a construction management plan that covers blasting, drilling (and perhaps on-site grinding), hours of operation modified for residential abutters, truck routes, etc.).

It may be that CDA will have submitted this additional material for the upcoming June 23rd meeting. If so, I would ask that the Board allow time for Town staff and the public to review it before considering closing the public hearing. Indeed, it might be appropriate for a Technical Review Group meeting to discuss a construction management plan.

Second, while CDA has submitted a *Revised Proposed Management Plan,* I do not recall any presentation or discussion of the plan. Some specifics should be of concern to the community.

Regards,

-- Robin
