Subject: tree cutting

I am writing from Lithuania, believe it or not, just say a red Friday updates about Eversource westing to cut a great many trees on Bennett Road and Packers Falls Road. Simply put: I object. I've seen no evidence that our lives interim have been approved by ever source dynamiting and expanding roads and not honoring and a 75-year-old town plans for official bike lanes, for example. nor have they used the money and energy dynamiting to facilitate underground conduit for wires to improve the aesthetics and functionality of the network. I'd like to preserve our scenic roads. What I have seen on the 108 project is excessive tree cutting without real merit or necessity, such as along the corner of Laurel Lane in room 108 towards the Mill Pond center property. to my eye, a mess is also being made of the Deuro point Road and Route 108 intersections.

well it is true that for years plans for bike lanes on the Durham  
books language because too many community members perhaps objected to  
removal of rocks and trees, in the last two years we have seen way  
too much in the opposite direction.

Sincerely,

Diane P Freedman
