Subject: Re: Eversource - Durham Point Road list of trees proposed for removal *

Eversource should not be allowed to remove any trees on Durham Point Road for new poles for a system that no one asked for and no one wants. State laws mandates a public hearing before any trees are removed on a Scenic Road. Eversource has already started putting in the poles without a hearing, confident that they can ride rough shod over the public and the Planning Board. Please don't let that happen.
