Town Planner's Review
Wednesday, March 25, 2020

XII. **Presentation on Stormwater Management.** April Talon, Durham Town Engineer.

Paul Rasmussen, Planning Board chair, asked April Talon, Durham Town Engineer, to give this presentation to help the board better understand the requirements related to stormwater management and how she reviews stormwater plans related to site plans. Typically, a stormwater management plan (or “drainage plan”) will consist of one or more drawings and a detailed written plan.

You can view the Durham Stormwater Regulations, Article 15, in the Site Plan Regulations here:
