Dear Mr. Behrendt and Planning Board,

This is an addendum to the emails we sent yesterday.

We hope that when making the decision about the rezoning to Rural, the Planning Board will take into account that some of the areas in the proposal are part of a larger land mass that The Nature Conservancy has identified as an important wildlife corridor. They are taking active steps to connect islands of protected land in order to provide easier movement of wildlife in search of food, water and nesting habitat. We feel that in this case, making it easier to raise animals in the Rural zoning proposal, runs counter to the work of the The Nature Conservancy and similar organizations.

Thank you.

Sincerely,

Alfred Ackerman
Nancy Schieb
