Subject: Zoning

Hi Michael,

I am in favor of the proposed zoning changes recommended by the Ag Commission. Undeveloped land is essential for a healthy planet as well as maintaining the "rural" charm that welcomes so many to our community. I am pleased the town is looking into the distant future and protecting a nonrenewable resource. As the climate changes, it is hard to predict how much of an impact will be felt by our area, but hopefully the forethought that has gone into this will help make things a bit better.

Sincerely,

Carol Tuveson
