Subject: Informational Letters Re: Gerrish

To the Planning Board,

I assume you have seen and read Gail Kelley's two recent letters to the Planning Board (the first going also to the Conservation Commission). These somewhat lengthy and very highly researched and detailed documents call for clear thought and consideration from the Planning Board after individual members of the Board give them careful study. There are many details to be considered and a map deserving of study.

After such a reading, an official site walk from the Bagdad Access by the Board is warranted.

The Planning Board should only proceed forward when it has complete and accurate information. In the end, this will enable the Board to make a well informed and wise decision.

Sincerely,

Diana and John Carroll
